1. Comment. As compared with the last reported period, incoming coal shipments increased from a daily average of 301 carloads to 307 carloads. Grain shipments arrived at the low rate of 17 carloads per day. It could not be determined whether only part of the shipments was covered, or whether grain shipments were also directed through another border station. There is also a possibility that grain shipments were detained in Poland, because coal shipments were given priority.
